Sue, Trevor and Zelda (and others)

Morning Activities:

- Rubbish clean-up
- Weeding

Morning Tea Agenda:

- 2012 calendar sales
- T-Shirt distribution

WA Christmas tree
Nuytsia Floribunda

Common grass-blue
Ziznia labradus

I went to have a closer look of this tall grass tree (*Xanthorrhoea sp.*) stem and stumbled upon a wolf spider (*Lycosa sp.*) between the flower spikes!

Native Gerberas
Trichocline sp.

I think this is one of those shots that I call it a complete one. A female Golden Orb Spider (*Nephila sp.*) devouring a bee while a small male hovers on top of it.

Summer starflower
Calytrix sp.

Can you spot a small spider in this shot?
