STORMWATER WESTERN AUSTRALIA

AUSTRALIAN WATER ASSOCIATION

New WAter Ways

Connecting communities with water sensitivity

Friday, 21 April 2 - 4 pm
Banks Reserve, Joel Terrace Mt Lawley

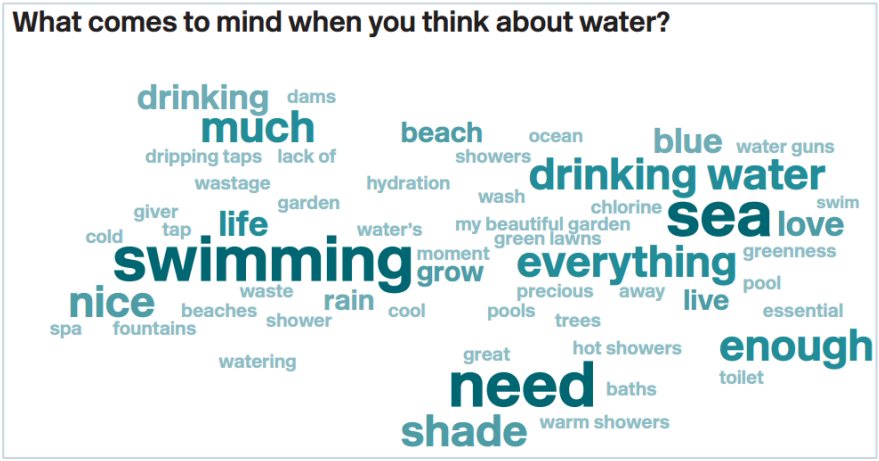
Bring the kids and come down to chat with local and national experts in water sensitivity. You will see a range of presentations on the Australian Water Outlook and findings from the Cooperative Research Centre for Water Sensitive Cities.

We will have displays of water sensitive city landscape designs, practical sessions on how to build a biofilter and activities for the kids including:

- a colouring in competition - Click **here** to download the poster and bring it on the day or colour in while you enjoy the sunshine!
- how to make "take home" tube stock with herbs and native plants
- macro-invertebrate sampling and identification – thanks to SERCUL

And for the big kids (adults) - bring your best engineering knowledge for the **Team WSUD Engineering challenge**. Can you demonstrate WSUD principles and build a solution to our problem in only 15 mins? Who knows more about managing water quantity and quality in a miniature catchment? Only $25 per team of 2 to 4 people. Enter **here**

There will be a coffee van and ice cream truck to cater for your afternoon tea needs.



Thanks also to:

- The Claisebrook Catchment Group who will be telling us all about the history of the area
- South East Regional Centre for Urban Landcare (SERCUL)
- SPEL Environmental
- The Water Corporation's Waterwise schools program
- Benara Nursery
- UWA Landscape and Engineering Students
- Department of Parks and Wildlife
- the CRC for Water Sensitive Cities experts in community messaging

Hope to see you there!

Come and talk with the experts!
