

# The Great Mozzie Checkup

Look around your home.

Tick the box when you have completed the action.

Make sure puddles aren't being made from sprinklers or rain in your garden.	
Get rid of all tins, jars, tyres and other items that may hold water.	
Check your yard to see if there is any water laying around.	
Keep native Western Pygmy Perch in ponds and plant local native plants to attract frogs and dragonflies—they eat mosquitoes!	
Put sand in pot plant saucers to soak up water.	
Get rid of plants which store water in the bottom of their leaves.	
Keep grassy areas mowed short and get rid of weeds.	
Make sure the wind can pass through areas.	
Keep your swimming pool clean and healthy.	
Make sure pool covers do not collect water.	
Make sure drains are clear and clean.	
Make sure leaves do not collect in gutters and downpipes.	
Make sure drains are clean and clear of leaves and rubbish.	
Fit fly screens on all windows and doors.	
Make sure there are no holes in the fly screens on doors and windows.	
Empty bird baths once a week.	
Empty your pet's drinking water daily.	
Turn over boats, canoes and dinghies; so they can't fill with water.	
Make sure tyre swings have holes in the bottom to drain water.	
Put away outside toys so they don't collect water.	
Check that outside lights are yellow. Insects don't like yellow lights!	

It is a good idea to complete this checklist regularly during the warmer months. Make a note on your calendar when you will go through the checklist again.
