

# Our Waterways Need You To Help Stop Algal Blooms

Many of our everyday activities contribute nutrients to our waterways. These nutrients enter the waterways from our street drains, through the ground or from creeks and streams. Nutrients cause algae to bloom in our waterways.

List seven everyday activities that your family may do which could cause algal blooms. For each activity list what can be done to prevent algal blooms.

| <b>Family Activity</b> | <b>How Does This Activity Affect the Waterways?</b>  | <b>What Can My Family Do To Prevent This?</b> |
|------------------------|--|---|
|                        | <ul style="list-style-type: none"> <li>• <i>Contributes nutrients which cause algal blooms.</i></li> <li>• <i>Animals and plants then die and we can't use the waterway for recreation.</i></li> </ul> |   |
|                        | <ul style="list-style-type: none"> <li>• <i>Contributes nutrients which cause algal blooms.</i></li> <li>• <i>Animals and plants then die and we can't use the waterway for recreation.</i></li> </ul> |   |
